

## 2018 – 2019 Honda Accord Air Release Bumper Reflector Overlays

Thank you for purchasing our Precut Head light overlays. These instructions will guide you through the process of installing these overlays on your vehicle. If for any reason you need some help please contact us: [Sales@cruxmoto.com](mailto:Sales@cruxmoto.com) FB.com/cruxmotorsports

Install Time: 10 mins

It is recommended that you apply these graphics in a warm space over 50 degrees Fahrenheit

What else you will need: Squeegee, Microfiber Towel, Rubbing Alcohol

For our installation video of this process please visit:

[www.youtube.com/user/CruxMotorsports](https://www.youtube.com/user/CruxMotorsports) and search Honda Accord Bumper Reflector

1. Clean the light thoroughly with rubbing alcohol and microfiber towel. Make sure light is completely clean and dry before applying decal, this will ensure for a smooth dirt free application.
2. Once the light is clean, peel the decal from the backing paper. Make sure your finger tips are also clean, the material will pick the dirt off your fingers and stick to the adhesive if so.
3. Align film starting towards the center of the car and work the film towards the outside of the car keeping tension on the film with one hand and pushing down just in the middle of the film with your other hand.
4. You want to make sure as you are aligning the film that it is staying centered. There will be some overhang on the top and bottom of the film you will take care of that in the next step.
5. Once the film is tacked down in the center section you are going to have to tuck the overhang behind the bumper. To do this you will want to first focus on the bottom section. Apply light pressure to the reflector to push it back into the bumper this will allow you to use a squeegee to tuck the remaining film behind the bumper.
6. Once this is completed repeat the process on the top of the reflector.
